FOR IMMEDIATE RELEASE

NEW STAFF AT HART CROWSER

Seattle, WA (March 2011). Eight new staff members have joined Hart Crowser's Seattle and Edmonds offices.

The new Seattle staff are **Megan Higgins, Ward McDonald, Emily Duncanson, Brian Payne, Jesse Overton, Karl Boettcher, and Lauren Hirt**. Higgins, a geotechnical engineer, will be working on the Alaskan Way Viaduct replacement tunnel and the Husky Stadium redevelopment. Duncanson, an environmental scientist, is working on the Lower Duwamish project for the Washington State Department of Ecology. Payne, an environmental engineer, is taking environmental samples at development projects in Burien, West Seattle, and the South Lake Union and Queen Anne areas in Seattle. Overton and McDonald are field geologists supporting the Amazon.com development, Sound Transit South Link, and Seattle Children's Hospital. Boettcher is Hart Crowser's new systems administrator, and Hirt is a project assistant.

Lisa McClary has joined the Edmonds, Washington office. McClary is an office administrator and marketing assistant.

Hart Crowser is an 85-person, employee-owned environmental and engineering consulting firm headquartered in Seattle, with offices in Edmonds, Washington, and Portland, Oregon. The firm specializes in environmental and geotechnical engineering, natural resources, and environmental remediation technologies. Corporate offices are located at 1700 Westlake
