**FOR IMMEDIATE RELEASE**

### **HART CROWSER NAMES MANAGER FOR ENVIRONMENTAL AND NATURAL RESOURCES**

(March 9, 2017) Hart Crowser has named Brad Hermanson as Manager for its Environmental and Natural Resources business unit. Hermanson is a chemical and environmental engineer with over thirty years of experience in cleanup of sites with complex environmental challenges. He has managed or provided management support on some of the largest environmental programs in the Pacific Northwest. He has overseen programs with up to thirty project managers at a time working on Superfund sites and formed and led teams dealing with natural resource permitting and compliance. Hermanson is a leader in various aspects of project and program management and speaks worldwide about managing the risk in environmental projects. He also teaches organizations to improve operational effectiveness.

Hermanson is an active member of the Project Management Institute's Portland chapter. He also serves on the Associated Oregon Industries' Water and Cleanup Committee. He is on the Industrial Advisory Board to the Oregon State University School of Chemical, Biological, and Environmental Engineering; and an advisor to the Sustainability, Health and Safety Program of Mount Hood Community College.

Hart Crowser is an employee-owned, 110-person engineering, science, and consulting firm headquartered in Seattle, with seven offices in Washington, Oregon, Hawai'i, and Alaska. The firm specializes in geotechnical engineering, environmental sciences and engineering, stormwater services, and disaster resilience. [www.hartcrowser.com](http://www.hartcrowser.com)
