FOR IMMEDIATE RELEASE

NEW ADDITION TO HART CROWSER'S SPOKANE OFFICE

(August, 2017) Hart Crowser Geologist and Environmental Scientist Ward McDonald has moved to Hart Crowser's newest office in Spokane. It's a return to his roots, since he earned his BS in Environmental Sciences and BS in Geology from Eastern Washington University in 2010. McDonald has been with Hart Crowser since 2010 in our Seattle office but now is part of our growing Spokane office. McDonald is involved with the Pacific Northwest International Section (PNWIS) of the Air and Waste Management Association (A&WMA) and volunteers with the Washington Trail Association (WTA).

McDonald, who is known at Hart Crowser for his sense of adventure, has put his climbing skills to work on rockfall protection projects and landslide investigations. He has used his academic and professional experience to support large construction projects (roads, schools, and even a football stadium) and investigation of contaminated properties, including former mines and Superfund sites.

Hart Crowser is an employee-owned, 100-person engineering, science, and consulting firm headquartered in Seattle, with seven offices in Washington, Oregon, Hawaii, and Alaska. The firm specializes in geotechnical and environmental engineering, natural resources, environmental remediation, stormwater services, and disaster resilience. www.hartcrowser.com
